

MERINO AND WOOL WASH (WASH IN)

A specially detergent for merino and wool items that restores breathability and extends the life of the garments.

How to use:

Shake the bottle

Put 75ml into the detergent compartment

Wash according to the manufacturer's instructions

Garments made from wool require special treatment to maintain their properties. With low thermal conductivity, wool keeps you warm in cold temperatures and cool in warmer conditions. Wool also works perfectly as a moisture regulator, as it can absorb up to a third of its own weight without feeling wet. Use a detergent suitable for wool to ensure that the natural oils are not dissolved out. Our STORM cleaner protects wool from stiffening and shrinking.
