

TEAR-AID REPAIR PATCHES

Clear patches for repairing holes and cracks. Airtight, waterproof, UV-resistant, flexible and can be cut to the required size.

How to use:

Thoroughly clean the surface to be patched and cut the patch to the desired size. Peel the patch off slowly as you apply it over the crack

For more detailed instructions, see the instruction manual

The patch is made of an exceptionally tough, matt, abrasion-resistant elastomer that resists glitches and tears. It is combined with an adhesive that is formulated for high bond strength on a variety of surfaces.

TEAR-AID repair patches repair many different products in almost ALL areas.
